About me

Senior iOS Engineer with 10+ years of experience designing, building, and maintaining consumer-facing mobile apps used by millions. Expert in Swift, SwiftUI, and modern iOS architectures (MVVM, Combine, async/await). Proven ability to lead app rewrites, improve performance, reduce crashes, and ship impactful features on aggressive timelines. Strong collaborator across product, design, and backend teams with deep knowledge of CI/CD, App Store deployment, and scalable mobile architecture.

Skills

iOS Development/Swift

SwiftUI

Javascript

ETL Development

Scripting

Linux/Unix

Extras

Languages

- **Primary** – Swift, SwiftUI, Javascript/TypeScript/Node, BASH, Python
- **Secondary** – Objective-C, C#, C++, Java

Computer Science Associations

- **SDC** – Software Development Club (Founding Member)
- **ACM** – Association for Computing Machinery

Austin Turner

Software Engineer

WORK EXPERIENCE

iHeart Radio – Senior iOS Developer

Feb 2023 – present

- Lead major architecture planning & rewrite of the iHeartRadio iOS app to modern Swift and SwiftUI, improving maintainability and scalability.
- Shipped new playback and personalization features with Combine & async/await, driving measurable increases in performance.
- Partnered with design and product to deliver seamless user experiences across millions of active users.

Fetch Package – Senior iOS Developer

April 2021 – Feb 2023

- Maintained and enhanced three enterprise iOS apps, adding high-impact features and fixing critical bugs.
- Collaborated closely with product team on feature planning and execution using Swift & SwiftUI
- Researched and evaluated emerging iOS frameworks for adoption, improving app performance and developer productivity.

General Motors - iOS/Mobile Developer

June 2016 – April 2021

- Created and maintained multiple robust production and proof-of-concept mobile applications.
- Designed app architecture and user experiences while aligning with scrum delivery practices.
- Integrated REST & GraphQL APIs and improved app stability.

Freelance – iOS Lead/Full Stack/Architect

Sep 2014 – present

- Architected & delivered complete mobile products end to end for startups and small businesses.
- Managed developers, designers, and business partners to launch polished, production ready applications.
- Integrated Firebase, Parse, third party SDKs, App Store Connect and maintained long term code quality.

Phunware – iOS Intern

Summer 2014

- Assisted in the transitioning from Objective-C to Swift.
- Rebuilt an in-house application using Swift.

Education

Texas Tech University
Whitacre College of Engineering

Lubbock TX

2012 – 2016

Bachelors of Science: Computer Science
Minor: Mathematics

Independent Projects

Startup Projects

- Co-founded a food and grocery delivery service called Caddy Delivery.
- Designed and built all technology stack (iOS app, backend services, web app, and admin tools).
- Hired and managed staff, and supported daily operations.

Freelance Development

- Reviewed client requirements, wireframes, and designs for technical feasibility.
- Created mobile and web apps from scratch, integrating modern BaaS solutions (Firebase, Parse, Supabase).
- Enforced Apple's Human Interface Guidelines for a polished iOS user experience.
- Deployed apps via App Store Connect & TestFlight
